

GNH95 TWO-STAGE GAS VALVE, HIGH-EFFICIENCY, MULTI-SPEED GAS FURNACE

Thank goodness for Goodman[®].

Goodman[®]

A COMFORTABLE VALUE

When selecting a gas furnace for your home, you are often searching to find the best combination for an ideal level of home comfort. You want to find a gas furnace that offers exceptional, dependable, and stable performance for many, many years. Most importantly, you want the best value possible. Faced with the decision to find a trustworthy and reliable gas furnace that delivers quiet, energy-saving operation and outstanding long-term value, the Goodman® brand GMH95 Gas Furnace may be your best option. The gas furnace in your home provides not only heating comfort, but it operates with your central air conditioner to deliver cool comfort too. So, your final choice is doubly beneficial. Whether it's the coldest day of the year or any day of the year, with the Goodman GMH95 Gas Furnace you'll be saying, **"Thank goodness for Goodman.**"

ENJOY THE COMFORT AND EFFICIENCY

Goodman's GMH95 High-Efficiency Gas Furnace with two-stage heating and a multi-speed circulating blower provides efficient and economical performance. Unlike single-stage gas furnaces that operate 'all on' or 'all off,' a Goodman brand multi-speed gas furnace typically runs up to 90% of the time in the low-speed capacity on most days. But when the temperature outside is frightfully cold, this furnace quietly ramps up to high-speed capacity to deliver all the warm, comfortable heat your home needs.

When operating at low-speed levels, your Goodman brand gas furnace consumes less energy to keep your home comfortable. In addition, the 96% AFUE rating on this gas furnace means that 96 cents of every \$1.00 of heating energy expense warms your home. Some older central heating systems are rated at 60% AFUE. The Department of Energy (DOE) established the AFUE (Annual Fuel Utilization Efficiency) system to calculate the annual operating cost of residential gas furnaces.

QUIET YOU CAN COUNT ON

The components of your Goodman brand GMH95 Furnace, including the multi-speed blower and two-stage gas valve, have been specially selected to reduce the noise levels common in other furnaces without these features. Plus, because your furnace's Dual\$aver[™] technology provides steady, gradual heat, it operates more quietly than furnaces without this technology. Finally, we house these components in a fully insulated, heavy-gauge steel cabinet. The result... quiet comfort.

THE HEART OF COMFORT

The award-winning design of the primary heat exchanger in the Goodman brand GMH95 is unique. It's constructed from tubular aluminized-steel and formed into a dual diameter configuration. Furthermore, the use of wrinkle-bend technology results in an extremely durable heat exchanger. A heat exchanger often is considered the essential component of any gas furnace. Additionally, this gas furnace has a stainless-steel secondary heat exchanger. This combination offers one of the best levels of reliability, durability, and efficiency you'll find within the Goodman brand.

Good

- Unique Aluminizied-Steel Dual-Diameter Tubular Heat Exchanger
- Two-Stage Gas Valve
- Dual-Diameter Tubular Heat Exchanger
- Efficient, Quiet Multi-Speed Circulator Motor
- Long Life, Durable Silicon Nitride Igniter System

- Corrosion-Resistant Vent Blower
- Electronic Control Board with Self-Diagnostics
- Auto-Comfort Mode for Enhanced Dehumidification
- Run-Tested at Factory Prior to Shipment
- Fully-Insulated, Heavy-Gauge Steel Cabinet
- Durable, Baked-Enamel Finish
